Crawford Sprinkler Company of Raleigh, Inc., is currently looking to add a fire sprinkler system designer (trainee) to our team of dedicated employees.

Job Description

The fire sprinkler system designer will prepare automatic fire protection sprinkler drawings using AutoCAD based program working both from site visits and architectural plans. Prepare project submittals in accordance with project specifications and applicable codes. Attend coordination and progress project meetings. Maintain communication with technical, sales, and installation co-workers to ensure smooth work schedule and process. Supervision of all work will be furnished by the Design Manager

Education

The applicant should have a B.S. in engineering, engineering technology or similar technical degree.

We seek qualified candidates that are:

- hard-working
- organized
- dependable
- strong analytical and mathematical aptitude
- computer literate, proficient in AutoCAD
- understanding of overall construction practices and terms.
- excellent written and oral communication skills with strong organizational skills.
- self-starter with ability to work in team environment.
- ability to multitask and prioritize.
- valid driver's license with good driving record.
- willingness to pursue NICET certification
- must pass background criminal check and drug screen

Must possess the abilities to work well under pressure, handle multiple projects simultaneously, and meet project deadlines. Good communication and computer skills are a must.

We provide a highly competitive compensation package as well as excellent fringe benefits including: 401k; medical/dental/life insurance plans; paid time off; incentive potential and much more.

Experience with AutoCAD, Navisworks and Building Information Modeling (BIM) is a plus. Applicants additionally should have the ability to comfortably navigate a Windows computer network environment, as well as have established skills to create and work with MS Word, Excel spreadsheets and databases.
