

## **Occupational Health & Safety Technician (full-time)**

### **Louisville Operations**

**Carbide Industries** in Louisville operates the only submerged Electrical Arc Furnace for the manufacture of Calcium Carbide in North America, providing the chemical energy needed to drive industrial innovation in steelmaking, foundry operations, acetylene production and chemical intermediates.

We currently have a full-time salaried job opening in Louisville for a **Safety Technician** to work with our **Occupational Health & Safety Department**. This position will report to our Safety Manager and provide support for our Louisville and Calvert City locations.

#### **This Position May Include, But Not Limited To**

Assisting our Safety Manager & Environmental Manager with various project duties  
Learn the particular hazards of our plant areas and assist in Safety & Housekeeping Audits  
Perform trend studies on incident reports and assist in developing improvement goals  
Create and update documentation such as training records, presentations, and reports  
Evaluate data collection systems, make recommendations and updates  
Assist in workers compensation case management  
Conduct risk assessments related to jobs performed (Job Hazard Analysis) and new equipment introductions  
Partner with production teams to investigate incidents to identify root cause(s) and how they might be prevented

#### **Minimum Requirements**

The successful candidate for this position will possess the following:  
Bachelor's degree in Occupational Health & Safety or a related field  
Minimum 3.0 GPA  
Knowledge of regulatory standards (OSHA, NFPA, etc.) and national consensus standards (ANSI)  
Physical, Background Check & Drug Screen required  
Occasional travel required  
Detail-oriented with very strong organizational skills and ability to prioritize multiple projects in a fast-paced, deadline-oriented environment  
Solid analytical and problem-solving ability  
Demonstrated ability to work in a team environment, yet self-starting and results-oriented  
Ability to effectively communicate  
Proficient with Microsoft Office Suite

**Work Environment:**

Moving machinery, dust, heat, cold and noise. Occasional use of a respirator, work at heights, within confined spaces. Daily PPE consists of hardhat, safety glasses, safety shoes and hearing protection.

Carbide offers a competitive compensation package that includes paid holidays, vacation, 401k, company paid cell phone, and life/disability/medical/dental/vision insurance.
